Description

NATURAL SELF TAN MOUSSE

APPEARANCE AND PROPERTIES

A light brown aerated bubbly mousse that pumps out from the can. This excellent product was tested against other self tans in beauty salons, supermarkets and departmental stores and was voted the best every time and in every respect. It is safe on the skin, won't stain clothes if allowed to dry, has a well-liked delicate fragrance and provides an instant as well as a long lasting very natural looking tan.

A DOUBLE ACTION:

1. An instant gentle looking tan with no streaks while applying.
2. A long lasting 3 to 4 day tan develops after about 2 hours which won't wash off.

KEY INGREDIENTS

DIHYDROXYACETONE: When combines with NONOXYNOL-12 it provides the long lasting natural looking tan which is so desirable.

CARAMEL: when combined with an assortment of colourings provides the instant natural looking tan and allows you to see where the product is being applied.

APPLICATION

Works well when applied any time but for best results thoroughly exfoliate skin first, rinse off and dry. Gently smooth the mousse over your skin. Use sparingly on elbows, knees and ankles. Avoid contact with clothes or fair hair until totally dry. For a darker tan apply twice allowing about ½ an hour between applications.

Wash hands immediately after use or they will go brown as well.

NB This product contains no sun protection.
