

Vitamin C Serum 20% 30ml

Brand: Fleur De Mer

Price From: \$127.00

Short Description

Vitamin C 20% Quicker, stronger results if required

Description

VITAMIN C SERUM 20%

for all skin types

30ml dropper bottle

The same serum as 11% but a very high 20% concentration of Vitamin C.

- More intensive action
- Quicker results
- Ideal start to a Vitamin C treatment

APPEARANCE AND PROPERTIES

A milky white serum. Vitamin C is specially formulated to effectively deliver its high concentrations (11% & 20%) of stable vitamin C to your skin. The L-Ascorbic Acid used in this serum is sub micron and highly active. The vitamin C is coated with a microscopic capsule to prevent its loss of effectiveness against the elements that could reduce its stability. The extensive studies performed by Duke University suggest L-Ascorbic Acid is an intensive anti-oxidant for skin cells once encapsulated and stabilised. Vitamin C has been recognised for many years as being of incredible value to the skin.

Applying Vitamin C topically you can expect:

- Reduced appearance of ageing
- Restored radiant glow
- Improved and revitalised skin texture especially with sun damaged skin
- Benefits of an antioxidant
- Reduced signs of fine lines on face and eye contours
- Lightening of skin particularly pigmentations
- Helping stimulate collagen production
- Better sun protection with sunblocks

KEY INGREDIENTS

L-Ascorbic Acid (20%): a highly active form of topical Vitamin C to give the above benefits and actions to the skin.

APPLICATION

Massage a few drops into face every day or night as directed on bottle. Include neck and décolletage to assist with sun

Our advice ~ wear a sunblock
